### **02. Hazards identification**

#### **Hazard designation**

Irritating to eyes and skin.  
Classification : Xi ; R 36/38

### **03. Composition/information on ingredients**

#### **Hazardous components**

ETHYL DIGLYCOL ACETATE ; EC-No. : 203-940-1; CAS-No. : 112-15-2

Percentage : 100 %

Classification : Xi ; R 36/38

For the wording of the listed risk phrases refer to section 16.

### **04. First-aid measures**

#### **General**

In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Immediately remove all contaminated clothing. Unconsciousness: lateral position - call a physician.

#### **After inhalation**

Remove concerned person out of danger area. Take the casualty into the fresh air and keep warm. Let in fresh air. Irregular breathing/no breathing: artificial respiration.

#### **After skin contact**

Wash away with soap and water and rinse. Apply cream carefully to the cleaned skin.

#### **After eye contact**

Remove contact lenses, keep eyelids open. Flush with plenty of water (10 - 15 min.). Call a physician.

#### **After ingestion**

Do not induce vomiting - call a physician. Keep at rest.

### **05. Fire-fighting measures**

#### **Suitable extinguishing media**

Alcohol resistant foam, CO<sub>2</sub>, powders, water spray.

#### **Unsuitable extinguishing media**

Waterjet.

### **Special risk posed by the substance or by the actual preparation, its combustion products or gases discharged**

Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.

### **Special protective equipment**

In case of fire do not breathe fumes. When extinguishing fires, use breathing apparatus with an independent source of air.

### **Additional information**

Cool endangered containers with water in case of fire. Do not allow the quenching water into the sewage system.

## **06. Accidental release measures**

### **Personal precautions**

Remove ignition sources. Provide for sufficient ventilation. Refer to protective measures listed in sections 7 and 8.

### **Environmental precautions**

Do not empty into drains. If the product contaminates lakes, rivers or sewages, inform appropriate authorities in accordance with local regulations.

### **Methods for cleaning up/collecting**

Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth and place in container for disposal according to local regulations (see section 13).

## **07. Handling and storage**

### **Information for safe handling**

Prevent the creation of inflammable or explosive concentrations of vapour in air and avoid vapour concentrations higher than the OEL (=Occupational Exposure Limit). Additionally, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Comply with the health and safety at work laws.

### **Information about protection against explosions and fires**

Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Keep away from ignition sources and provide for good ventilation. Preparation may charge electrostatically: always use earthing leads when transferring from one container to another.

### **Requirements to be met by storerooms and containers**

Containers which are opened must be carefully resealed and kept upright to prevent leakage. Keep container tightly closed. Never use pressure to empty: container is not a pressure vessel. No smoking. Prevent unauthorized access.

### **Information about separation of incompatible products**

Keep away from oxidizing agents, from strongly alkaline and strongly acid materials.

### **Further information about storage conditions**

Always keep in containers of same material as the original one. See also instructions on the label. Avoid heating and direct sunlight.

## **08. Exposure controls/personal protection**

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapour below the OEL (=Occupational Exposure Limit), suitable respiratory protection must be worn.

### **Personal protective equipment**

#### **General protective and hygiene measures**

Do not eat or drink during work - no smoking.

#### **Respiratory protection**

If workplace limits are exceeded, a gas mask approved for this purpose must be worn.

#### **Hand protection**

Solvent-resistant protective gloves must be worn. After washing hands replace lost skin fat by fat containing skin creams. Avoid contact with the skin and mouth.

#### **Eye protection**

Use safety glasses.

## 10. Stability and reactivity

### Conditions to avoid

Stable under recommended storage and handling conditions(See section 7).

### Materials to avoid

Keep away from oxidizing agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.

### Hazardous decomposition products

When exposed to high temperatures may produce hazardous decomposition products such as carbon monoxide and dioxide, smoke, oxides of nitrogen.

## 11. Toxicological information

### Experience on practice

This product is unlikely to harm health, given normal and proper handling and hygienic precautions. Prolonged inhalation of vapours in high concentrations may lead to headache, giddiness and nausea. In case of contact with the product: danger of resorption through the skin, irritation of skin/mucous membranes.

### Additional toxicological information

The product was classified in toxicological terms on the basis of the results of the calculation procedure outlined within General Directive on Preparations (1999/45/EC).

## 12. Ecological information

### Additional ecological information

#### General ecological information

Do not empty into waters or drains. Toxic effect on fishes and micro-organismes.

## 13. Disposal considerations

### Product

Do not empty into waters or drains. Can be taken to a suitable incineration centre in observance of local regulations. Recycling possible, contact manufacturer.

#### Waste key

ABFALLSCHLÜSSEL nach AVV/EWC 14 06 03 Andere Lösemittel und Lösemittelgemische.  
Die empfohlene Abfalleinstufung bezieht sich nur auf den reinen Lösemittelabfall.

### Classification according to EC directives

#### Danger symbol and danger designation

Xi ; Irritant

#### R-phrases

36/38      Irritating to eyes and skin.

#### S-phrases

35      This material and its container must be disposed of in a safe way.  
37      Wear suitable gloves.  
26      In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.  
24/25      Avoid contact with skin and eyes.

### International regulatory information

Content VOC (EC) : 100,0 % b.w.

## 16. Other information

### Further information

The details in this material safety data sheet satisfy national and EC legislation. We have no knowledge or control over the user's working conditions however. The product may not be used for any purpose other than that specified in chapter 1 unless written consent has been obtained. The user is responsible for the observance of all required statutory provisions.
